DETAILED ACTION

1. It would be of great assistance to the Office if all incoming papers pertaining to a filed application carried the following items:

1. Application number (checked for accuracy, including series code and serial no.).
2. Group art unit number (copied from most recent Office communication).
3. Filing date.
4. Name of the examiner who prepared the most recent Office action.
5. Title of invention.
6. Confirmation number (See MPEP § 503).

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the **“combiner circuit for combining the soft decision outputs from the plurality of programmable demodulators into at least one soft decision data stream”** of claim 33, 51, 58 and 63 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for

consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

3. Claim 63 is objected to because of the following informalities: in claim 63 the word "FFT" should be defined. In claim 64, the ";" after the word circuit should be ---,----. Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 33-41,45-48,51-70 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.
6. The specification as originally filed does not have support for **"the combiner circuit for combining the soft decision outputs from the plurality of**

programmable demodulators into at least one soft decision data stream” as

claimed in claims 33,51,58 and 63 (see figs. 12 and 13).

7. The specification also does not have support for these claimed particular limitations **“the output of the mixers in-phase and quadrature phase”** of claim 36,45; **“the combiner circuit combining the soft decision outputs according to inter-symbol interference”** of claim 38; **“the plurality of low pass filters as Square Root Raised Cosine Filters”** of claim 37,46; **“the combiner circuit combining the soft decision outputs according to attenuation and phase distortion introduced by the channel”** of claim 39,48; **“the programmable demodulators providing the soft decision outputs according to inter-symbol interference”** of claim 47.

8. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

9. Claim 58 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 58, the particular limitation “combining the at least one soft decision into at least one soft decision data stream” is unclear. It is not clear how one data is combined by it self.

In claim 63, “the low pass filters” lack clear antecedent basis.

Allowable Subject Matter

10. Claims 10-15,26-31,42-44,49-50 are allowed.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Temesghen Ghebretinsae whose telephone number is 571-272-3017. The examiner can normally be reached on Monday-Friday from 8 to 6. The examiner can also be reached on alternate.
